## Institute of Directors

In a partnership with HSBC Partnership Cards, red24 is to provide Institute of Directors Visa Gold Cardholders access to its personal security services. The IoD Visa Gold Card now comes with 24-7 access to security staff to assist in issues from identity theft to stalking and travel security. The IoD card-holders can elect to upgrade to the red24alert service, which includes on-the-ground assistance in the event of identity theft and physical response to any life threatening situation at home or abroad. red24 Managing Director, Simon Wakeling, said: "IoD Visa Gold Cardholders are top business professionals and can be vulnerable to identity theft as a result of their position, or subject to risks when travelling. red24 can assist them and, crucially, their family members before, during or after a security incident."
