InterGlobal launches PMI plans for Africa

International private medical insurer InterGlobal has launched two new international private medical insurance (PMI) plans, designed especially for the African market.

The new InterGlobal Africa Plans are available either as individual or group schemes and offer two levels of cover. InterGlobal said its Africa UltraCare Standard Plan provides "comprehensive" cover against the cost of inpatient medical treatment while members of the Africa UltraCare Select Plan also benefit from their choice of two levels of maternity cover, inclusive eye examinations and cover for AIDS/HIV treatment without the standard four year waiting period. Both plans also provide access to emergency medical evacuation and red24 AdviceLine for 24/7 personal security advice.

Members can choose from two geographic levels of cover. The Africa and Jordan cover (area 7) is designed for members who only require cover on the African continent, while the area 5 cover also covers Europe, the Middle East, Indian sub-continent and the Philippines for members who expect to travel more widely.
